PROPHYLAXIS AND TREATMENT OF INTERNAL DISEASES

By FREDERICK FORCHHEIMER, M.D.

Professor of Theory and Practice of Medicine, Medical College of
Ohio, University of Cincinnati

THIS book, after years of labor in preparing the manuscript, is now ready. Covering as it does a subject never before adequately treated, the work will be enthusiastically welcomed by physicians the world over. Many vital points on the prevention and treatment of diseases which are underestimated by many medical writers are given by Dr. Forchheimer the consideration which the subjects demand.

No Practitioner, no Student can afford to be without it

NEW BOOKS

POSEY & SPILLER

The Diagnostic Relations Between the Eye and Nervous System

EDITED BY WM. CAMPBELL POSEY

Professor of Ophthalmology at the Philadelphia Polyclinic, AND

WM. G. SPILLER,

Professor of Neuro-Pathology at the University of Pennsylvania

Octavo. 800 pages. Thoroughly illustrated. Cloth \$6.00
With 22 chapters by the leading specialists of the U. S.

By opening up a new field for the general practitioner, and enabling him to become acquainted with symptoms hitherto almost entirely unknown and unrecognized by him, though they are frequently first to appear in many cases of spinal and cerebral involvement, it is thought that this work will aid greatly in the advance of medical science, as, in addition to the above, it makes ophthalmologists and neurologists better acquainted with the subjects of which they treat.

KREHL'S PRINCIPLES OF CLINICAL PATHOLOGY

BY LUDOLF KREHL

TRANSLATED FROM THE THIRD GERMAN EDITION AND EDITED BY

A. W. HEWLETT, M.D.

Instructor in Clinical Medicine at the Cooper Medical College, San Francisco, Cal.

With an introduction by Wm. Osler

Octavo. 504 pages. Illustrated. Cloth \$5.00

Disease is here treated as a perversion of physiological function. To the physician, this point of view is of fundamental importance, for he is dealing essentially with abnormalities of function.

The work is recognized as authoritative in Germany and it has been translated into at least five other languages. To the American profession, no other introduction is necessary than that given to it by Dr. William Osler.
